

Announcing the music card that turns you into a Rock Star.

Girls will climb over each other to kiss your feet.

Some companies will say anything to sell you a music card. One is "designed by leading experts". One's called the "Super Sound Generator". Another is "part of the excitement of owning a personal computer". Then there's the one with "flash & crash sound effects". And how about the one that "generates the sound of any

musical instrument — real or imagined". Sure. Before you listen to their claims, listen to their music. That's where the real differences show up.

You can hear our music card at your local Apple dealer.

Or, just send us \$1 and we'll send you a demo record of our 9 voice card.

When you listen to a music card, ask if the song you're hearing was programmed by a customer, or by experts at the company that made the card. Was it done with the software you'll get, or with special programming? Over half the songs on our demo record were entered by customers using the software supplied with the card — you can do it the same way. Our manual shows you how step by step.

The "Apple Music II" has 9 voices and is just \$195*.

The "Apple Music Synthesizer" has 3 top-quality voices for just \$265*.

See your local Apple dealer, or write for more details.

Quality computer music products since 1975.

Bill Fickas, lead guitar for the Broken Rubber Band.
